Solutions you can count on

Westinghouse

Solutions you can count on

As a leader in the ceiling fan industry, Westinghouse is dedicated to making comfort and convenience a priority in the products we develop. To meet the specific demands of today's global marketplace, we offer contemporary and traditional product designs that have resilience and character. Whether you are looking for fashion-forward designs or reliable quality products, we have your solutions right here.

Since 125 years, people all over the world have trusted Westinghouse to provide high-quality, reliable products for their homes and businesses. We continue that tradition today with our extensive assortment of ceiling fans.

Customers in 128 countries choose Westinghouse for quality products and dependable customer service.

Westinghouse – A trusted brand since 125 years!

George Westinghouse was a renowned inventor long before his name became a brand. He is the most productive inventor on record, credited with over 361 patents – many of them “firsts” that changed the way the world lives.

George Westinghouse’s spirit of innovation and commitment to improving quality of life is alive and flourishing at Westinghouse. Our solutions are as effortless as redesigning a store display to make products easier to find, or as revolutionary as reconfiguring the design of a ceiling fan to make it simpler and safer to install.

Westinghouse ceiling fans are engineered and tested to meet or exceed high-quality standards to light your home, office or business.

Our ceiling fans reveal the essence of today’s lifestyle trends. While you enjoy our newest editions, we’re already busy planning for the future by exploring innovative options and new technologies that maximize form and function.

SERVICE

Ceiling fans for every room

Low ceilings

Install a hugger ceiling fan or ceiling fans without a down rod in rooms with low ceilings.

Standard ceilings

Install ceiling fans with or without a down rod in rooms with standard ceilings. See page 42 to view our full assortment of extension down rods.

SELECTING THE RIGHT SIZE CEILING FAN FOR EVERY ROOM IN YOUR HOME

Maximize air flow by installing an appropriately sized ceiling fan for your room:

For rooms up to:	12 qm	Use 30" - 36" ceiling fans.
For rooms up to:	15 qm	Use 42" ceiling fans.
For rooms up to:	20 qm	Use 44" - 48" ceiling fans.
For rooms up to:	25 - 30 qm	Use 52" ceiling fans and larger.
For rooms bigger than:	30 qm	The use of more than one ceiling fan is recommended.

Room size and ceiling height are important issues when selecting your ceiling fan. Be sure to choose a ceiling fan that best suits your home.

High ceilings

Install ceiling fans with extension down rods in rooms with high and sloped ceilings.

Sloped ceilings

See page 42 for a full assortment of extension down rods.

Fashionable, high quality ceiling fans and light kits add comfort, color, and complementary style to any room. A trusted name for over 120 years, Westinghouse guarantees the construction of its ceiling fan motors with 10 year warranty. You can be sure if it's Westinghouse.

Summer & Winter Operation of a Ceiling Fan

SUMMER & WINTER

Ceiling area:
30°C → 25°C

You want a pleasant room climate?

Center of the room:
29°C → 25°C

Use a Westinghouse ceiling fan in your home, which creates a cool climate and temperature during summertime!

Bottom room area:
28°C → 25°C

Summer Operation

For year-round comfort and maximum energy savings, Westinghouse ceiling fans include a reversible switch that allows the ceiling fans to be used during cool or warm weather.

In the summer, keep your home cool by running your ceiling fan counterclockwise.

Year- Round Comfort & Efficiency

Ceiling area:
26°C → 24°C

Keep your home warm
in the winter & save
energy!

Center of the room:
24°C → 25°C

The ceiling fan creates a
warm and pleasant room
climate in your home
which saves up to
30% energy costs.

Bottom room area:
22°C → 24°C

Winter Operation

In the winter, run your ceiling fan clockwise to re-circulate warm air from the ceiling, eliminating cold spots and drafts.

Unique in beauty and design, our Premium ceiling fans combine high fashion with high quality.

Includes remote control
and reverse switch

- 65% less Energy Consumption
- Longlasting Product Lifetime
- Higher Speed Effort
- 6 Speed Options
- Virtually Silent & steady RPM
- Smaller Fan Designs

What is your advantage of a DC-Motor ceiling fan?

The Lenerco Fan Motor reduces more than 65% energy consumption compared to a standard AC Fan Motor. On low speed, the energy consumption is similar to a 4 Watt LED light bulb.

Long-lasting DC motor fans utilize a brushless motor and are able to reach the same RPM as an AC fan but with lower energy consumption (lower wattage). The Lenerco DC motor fan offer a higher torque due to the larger diameter of the inside magnetic field. The compact motor allows for a smaller fan design that meets a wide variety of room applications. Smaller fans are more versatile and meet the needs of today's home owner.

The exquisitely executed sleek designs of our Modern collection capture the essence of today's lifestyle trends through cool colour tones, chic finishes, and elegant styles.

For optimum performance, ceiling fan blades should be at least 7' / 2.4 m from the floor but no higher than 8-9' / 2.8 m in order to best cool a room.

For ceilings 9' and higher, an extension down rod is required to bring the ceiling fan down to the proper height above the floor.

***Dual Mount System:**

These versatile ceiling fans may be installed with or without the extension down rods which are included in the packaging. This flexibility allows you to install the fan either close to the ceiling or at a lower level in rooms with higher ceilings.

**** Downrod only:**

Down rod ceiling fans must be installed with the down rod which is included in the packaging. You may replace the down rod with ones featuring a length between 12"/30,5 cm or 18"/46 cm. The option for a 12" or 18" downrod installation varies for each model!

*****Hugger:**

Specially designed for rooms with lower ceilings, hugger fans can not be installed with a down rod.
