FANIMATION : AIR APPARENT

Fanimation's focus is producing creative and functional fans that provide ultimate personal comfort using the latest technology for energy efficiency and seamless control. From our humble beginnings in 1984, inside Founder and CEO Tom Frampton's Pasadena, California garage, ingenuity and quality craftsmanship have been central in every product we manufacture. Our timeless and inspired fans are sought across the globe.

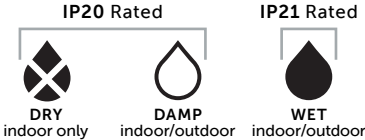

You will find Fanimation in some of the most luxurious locales—from tropical resorts to the heart of your home.

CHOOSING YOUR FAN

LOCATION IS EVERYTHING

- Where you will install your fan is the first step in selecting the right fan for your space.
- Dry, indoor location: Choose from any of our fans—dry, damp or wet rated.
 - Outdoor covered or high-humidity indoor location: Choose from our damp or wet rated fans.
 - Outdoor location with likely direct contact with water: Choose from our wet rated fans.

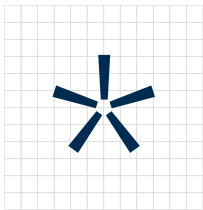

We've made it easy for you!
Look for these icons to identify location rating:

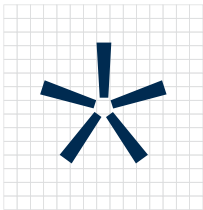

SIZE MATTERS

- The size of your room will help determine the size of your fan, identified by blade sweep. The following are general guidelines.
- Optimal performance will come from mounting your fan in the center of the room.
 - If you have a long or large room, consider the use of multiple fans
 - Scale is a personal preference. Large diameter fans can go in both small rooms and larger rooms—it's all in the look you desire.

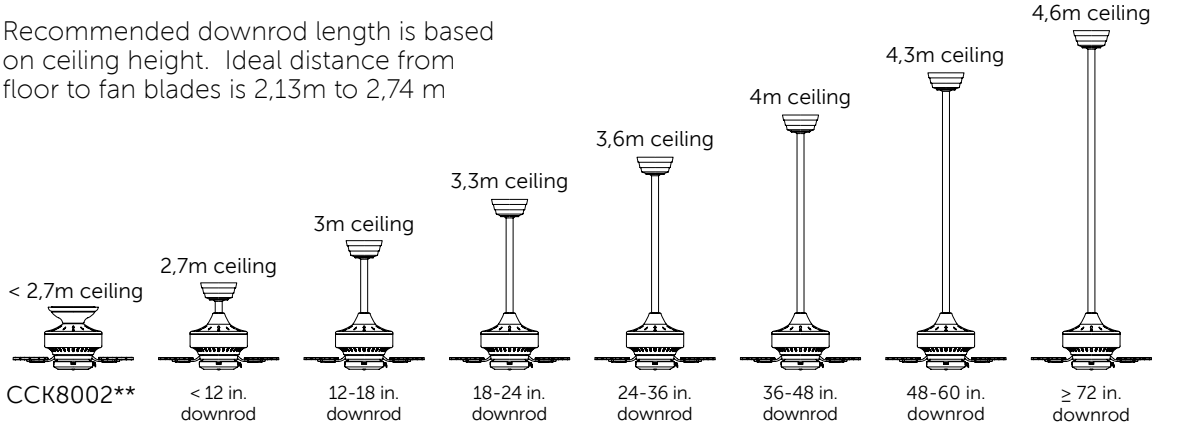

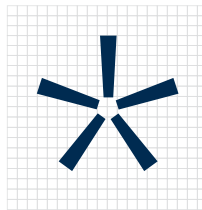

SMALL ROOM
132cm or smaller

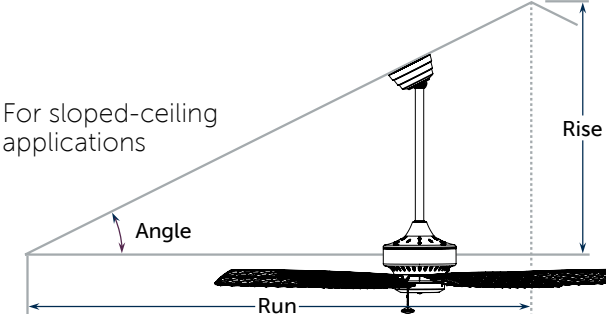

LARGE ROOM
132cm or larger

GREAT ROOM
152cm or larger

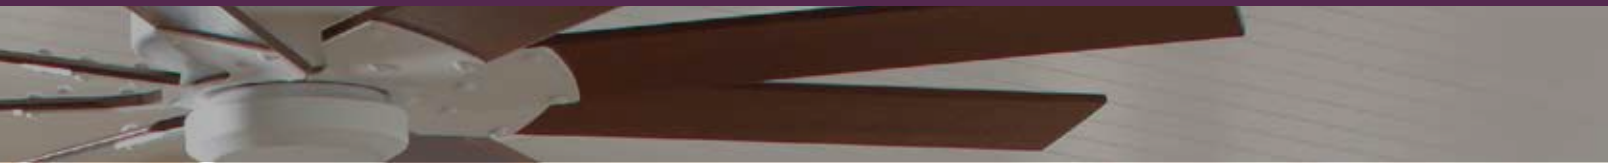

For lengths greater than 72 in., join two downrods with DR1-CP** coupler

Pitch (Rise/Run)	Angle	Minimum Downrod
1/12	4.8°	Standard
2/12	9.5°	6 in.
3/12	14.0°	12 in.
4/12	18.4°	12 in.
5/12	22.6°	18 in.
6/12	26.5°	18 in.
7/12	30.3°	24 in.
8/12	33.7°	24 in.
> 8/12	> 33.7°	> 36 in.

Ideal distance from floor to fan blades is 2.13-2.74m.

IDENTIFYING FEATURES IMPORTANT TO YOU

We offer a diverse line of fans with equally diverse features. As you choose your fan, identify the features that matter to you—use Features Legend below to understand the Features icons.

fan control type				light kit included + lamping info	number of fan speeds + location of reversing switch	fan, blades and light sold separately	features energy- efficient DC motor
 CONTROL wall	 CONTROL remote	 CONTROL pull chain	 CONTROL rotary	 WATTAGE bulb style	 SPEED reverse location		

UNDERSTANDING AIRFLOW

We provide airflow information—at high speed—for each fan. Airflow is measured in CFM (cubic feet per minute), energy used is measured in watts and the energy efficiency of the fan is measured in CFM per watt.

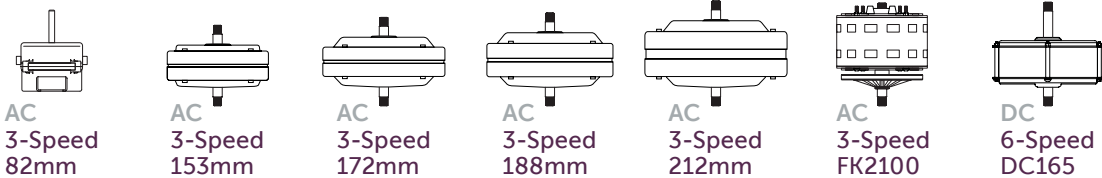

ENERGY INFORMATION AT HIGH SPEED:

Airflow	Electricity Use	Airflow Efficiency
6942 Cubic Feet Per Minute	65 Watts (excluding lights)	107 Cubic Feet Per Minute Per Watt
The greater the number, the greater the air moved	Energy consumed	The greater the number, the more efficient the fan is

FANIMATION MOTORS—AC AND DC

All Fanimation motors are built using high quality materials and components, insuring years of reliable and dependable operation for every Fanimation fan.

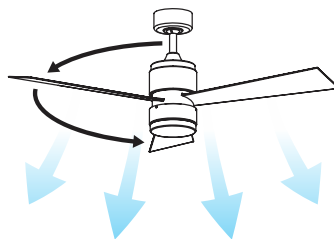

- Our fans are equipped with either an AC motor or DC motor.
- AC motors use supplied power directly and regulate speeds by controlling frequency.
- DC motors convert supplied power and regulate speeds by controlling electrical current.
- Our AC motors come in 1-, 3- and 4-speed variants.
- Our DC motors come with 6 speeds. DC motors are more efficient, generate more torque and are virtually silent.

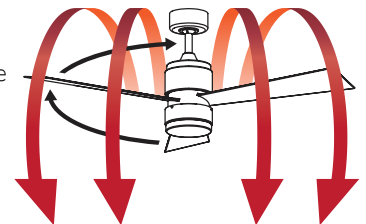

SEASONAL CEILING FAN USE

Ceiling fans save money year-round when turning in the proper direction.

WARM WEATHER
Airflow with counter-clockwise rotation, as you look up, provides a cooling breeze

COOL WEATHER
Airflow with clockwise rotation, as you look up, forces warm air downward

Not recommended for use in sound sensitive areas.

The Brewmaster® carries on Fanimation's reputation for reproducing unusual, yet functional, belt-drive fans. These fans were originally produced in the late 1800s by Snediker & Carr®, the premier belt-drive fan manufacturer of their day. Fanimation has adapted this timeless masterpiece to install and operate with more ease and durability.

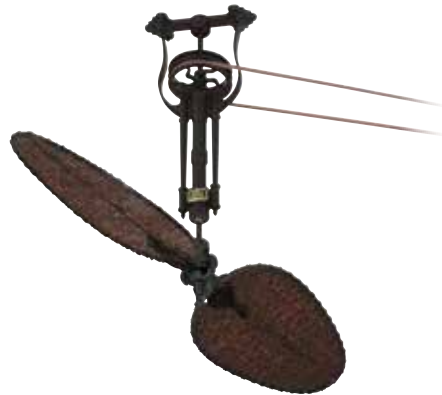

- Neoprene belting replaces the high-maintenance leather belts.
- Lead and copper babbitt sleeves have given way to sealed ball bearings.
- Hardwood laminate blades that resist warping and splitting replace the temperamental solid wood blades.

The Brewmaster® combines the latest technology with several blade options including the original oversized wood blade design. The Brewmaster® is powered by a gearless direct drive motor, and allows you to operate one or two fans.

ANTIQUe FAN MUSEUM

presented by the Antique Fan Collectors Association

PASSION, HERITAGE & PRESERVATION

Led by our Founder and CEO, Tom Frampton, Fanimation is dedicated to preserving the history of fans and the fan industry. For years, Tom has been an avid antique fan collector and member of the Antique Fan Collectors Association (AFCA). The AFCA membership has operated a museum since 1997, displaying fans on loan by the membership; this museum was in Wichita, Kansas up until 2008, when the need to relocate the museum arose. Answering the call to preserve viewing of the one-of-a-kind collection, Fanimation made the offer to house the museum at its facility in Zionsville. The move and set-up took nearly a year and the museum saw its reopening July 23, 2009. Since that time, the museum has grown and continues to grow, housing over a thousand antique fans on two floors. Tom's own unique collection of fans is a part of the museum collection along with over 500 antique advertising style hand fans and other fan memorabilia.

LOCATION

10983 Bennett Parkway
Zionsville, IN 46077

HOURS

Monday thru Friday 10 am - 4 pm
Or call for an appointment, 317-733-4113

MUSEUM HIGHLIGHTS

- The AFCA museum contains more than 1,000 antique ceiling, desk and hand fans with over 140 manufacturers represented
- The oldest electric desk fan in the museum dates from the early 1890's
- The oldest non-electric fans (steam, belt & pulley or water powered) date from the early 1880's.
- It is the only antique fan museum open to the public in the world
- The AFCA has approximately 700 members worldwide
- The museum contains some of the earliest battery-powered fans, water-powered fans, wind-up fans, electric hand-held fans, ceiling fans, wall fans, desk fans, pedestal fans, rail-car fans and fans that don't even look like fans.
- The museum contains hundreds of hand-held fans that feature advertising from manufactures, retailers, politicians and movie stars.
